

Nikhil Biju

Thrissur, Kerala, India | +91 8891941923 | nikhil0803@gmail.com

Professional Summary

B.Tech graduate in Artificial Intelligence and Data Science with hands-on experience building Python-based AI/ML projects involving machine learning, computer vision, NLP, and backend development. Experienced with ML workflows and Flask/Django applications, seeking entry-level roles in AI/ML, Data Science, Data Analytics, or Python development.

Education

Data Analytics Professional with Generative AI Integration

Ducat

Currently Pursuing

Delhi, India

Bachelor of Technology in Artificial Intelligence and Data Science

Viswajyothi College of Engineering and Technology

Oct 2022 – May 2026

Kerala, India

Higher Secondary Education

Kendriya Vidyalaya

2020 – 2022

Kerala, India

Technical Skills

Programming: Python, SQL | **Data & Analytics:** Pandas, NumPy

Machine Learning / AI: Scikit-learn, TensorFlow, Keras, CNN, LSTM

Computer Vision: OpenCV | **Web / Backend:** Flask, Django, HTML

Databases: MongoDB, MySQL | **Tools:** Git, GitHub, Jupyter, MATLAB, Simulink

Experience

Python Development Intern | Ociuz Infotech, Thrissur, Kerala

Jul 2023 – Aug 2023

- Completed hands-on Python development training covering variables, loops, functions, file handling, and scripting fundamentals.
- Built small command-line applications, including a calculator and a to-do application, to apply core programming concepts.

Projects

ModelFlow – AI Model Generation & Training Platform | Python, Flask, TensorFlow, PyTorch, Hugging Face, OpenCV

- Developed a no-code/low-code AI platform that converts natural-language prompts into machine-learning workflows, enabling users to train models without manually writing training code.
- Built Python/Flask backend workflows integrating TensorFlow, PyTorch, Hugging Face, and OpenCV to support image, text, and tabular machine-learning tasks.
- Implemented workflows for computer vision, NLP, and transfer learning, with real-time training-progress tracking and model export.

E-Learning Engagement Detection System | Python, TensorFlow, Machine Learning, Computer Vision

- Developed a multimodal AI system to estimate learner engagement using facial expressions, eye movement, mouse behavior, and audio signals.
- Integrated machine-learning and deep-learning components for behavioral analysis with Flask and MongoDB for application-level processing and data management.

AI-Powered Fault Detection for Machining Processes | Machine Learning, Computer Vision

- Developed a real-time monitoring system for machining operations including cutting, drilling, and milling using vibration, temperature, and camera data.
- Applied machine-learning models to identify early signs of tool wear, overheating, and abnormal vibration for industrial fault detection.

Achievements

Runner-Up – Srishti 2025 National Level Technical Project Exhibition & Competition

Feb 2025

SAINTGITS College of Engineering

Certifications

- The Joy of Computing Using Python – NPTEL, IIT Madras
- Introduction to Data Science – Infosys
- Introduction to OpenAI GPT Models – Infosys
- Probability and Statistics Using Python – Infosys

Languages

English, Hindi, Malayalam
